

AIRPORT PROJECTS AND PRIVATISATION

Carrying out your airport projects with expertise and ambition.

You are ...

- A government or its civil aviation authority/department
- An international institution, a general consultant or a bank
- An engineering consultant office
- An airport operator or a consortium
- A civil works company

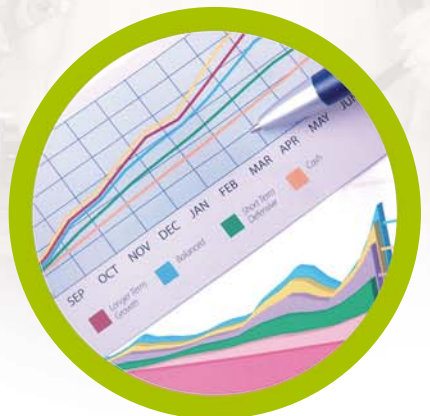

You need...

Experience and knowledge in the fields of traffic forecast, business planning, airport financing and institutional consulting.

We offer you...

- Traffic forecasts
- Strategic development plans (Human Resources, Training, Organisation, Marketing Plan...)
- Economic and financial audits
- Business plans and financial models
- As a component of a more global project: technical studies, reorganisation of air services, institution scheme, investment plan, master plan, feasibility studies, airport development studies...
- As a support to airport privatisation, concession, BOT or management contract process:
 - For Governments willing to separate civil aviation regulation and airport management / operations: institutions scheme, support to privatisation process & invitation to tender procedures...
 - For Candidates bidding for a BOT, privatisation or management of airport: we provide support to bid process

Furthermore, Egis Avia can bring its specific technical expertise in design, construction of infrastructures projects, airport and air navigation equipments. Our subsidiary SEGAP in charge of the management of Abidjan (Ivory Coast) and Libreville (Gabon) airports can also provide operations and management experience for your own projects.

round the world to be a more
