

ECONOMIC STUDIES in AIR TRANSPORT

Primordial advice through consultancy, support studies and economic analyses.

You are ...

- An airline
- An airport operator
- A public body decision maker (local or national) or a tourism organisation
- An international institution
- A bank or equity investor

You need...

Economic knowledge and expertise in Air Transport to build a new strategy, analyse a new market, develop your business or implement new regulations.

We offer you...

Economic and financial consultancy as well as audits within the Economics, Institutions, Regulation and Organisation skill units:

- Air transport master planning including traffic forecasts
- Route development and economic analyses
- Cost-benefit analyses
- Feasibility studies
- Strategic development plans

We can advise you and offer you our solid expertise and multidisciplinary approach in several specific issues: multimodality, low cost airlines, environment, sustainable development, company core business, privatization / corporatization situations...

Ad hoc consortium with partners in civil aviation and our partnerships with international and local Air Transport independent experts are additional assets to address technical matters worldwide and to provide the best service package.

Worldwide references ...

A comprehensive approach to the sector as a whole has enabled us to be a precious partner over the years for civil aviation stakeholders.

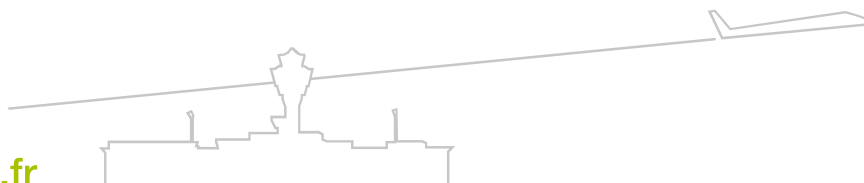

At a European level, this know-how gave us the opportunity and privilege to participate into huge projects with the European Commission and Transport & Energy Authorities (EMERTA – EC DG TREN and GOBAN projects) to expand the ambitions of Europe in the air transport, communication systems and airborne equipment industries.

At regional airports and local authorities/communities levels, in Europe as well as in other Continents, we have provided:

- traffic forecast and prospective analyses
- development plans
- economic analysis
- financial appraisal
- profitability studies
- business plans
- privatisation/PPP feasibility studies

Preparing the ground with them for successful air transport strategies or development projects, we always intervened with the objective to better integrate each actor in the air transport industry.

Our range of customers includes a high diversity of issues sales from regional concerns such as Dordogne, Pyrénées, Limousin or Picardie in France to international airports such as Luxor, Sharm el Sheikh, Hurgadha in Egypt, Tallinn, Costa Rica, Cyprus airports.
