

# AIR TRANSPORT REGULATION / AIRWORTHINESS

Your support to make international regulation and legislation clearer and simpler.

## You are ...

- A government or its civil aviation authority/department
- An international institution, a general consultant or a bank
- An aircraft manufacturer
  - An airline operator or a staff training centre
  - An engineering consultant office

## You need...

Expertise in Civil Aviation Authorities Organisation and Cooperation, Aircraft Airworthiness / Operations, international regulation, standards and recommended practises (SARPs).

## We offer you...

- Audit, advice and/or assistance if you consider reorganising your company / institution
- Advice and/or assistance to implement new/updated aviation regulations
- **For governmental projects:**
  - Institutional and technical studies such as the definition of a follow-up action plan after an ICAO audit
  - Update of your Civil Aviation Code or equivalent and of your technical regulations
  - Reorganisation of your Civil Aviation Authorities services aiming at a full compliance with ICAO, FAA, JAA and EASA (European Aviation Safety Agency) standards, ...
- **For an Airline, a training centre or an aviation manufacturer:**
  - Organisational studies and/or support to ensure compliance with the latest aviation Operations, Maintenance, safety and technical standards
  - Training on ICAO, FAA, JAA and/or EASA regulations

Furthermore, we have access to a network of international experts (including the French Civil Aviation Authority) and a pool of competences within the Egis group, thus providing multidisciplinary skills through a unique interlocutor.
