

## Press release

07 April 2009,

### Construction of a temporary air terminal in Oran

**Egis Avia signed a contract on 25 March 2009 for the construction of a temporary air terminal in Es Senia Airport in Oran, Algeria.**

The Sonatrach / Activité Aval Group, the largest Algerian oil company contracted Egis Avia for the design and build of a temporary terminal in Oran's Es Senia Airport, with the German Röder as joint contractor.

On March 25, the Vice-President of Activité Aval and the Executive Vice President of Egis Avia held a contract signature ceremony in the presence of Mr Hadj Larbi, Chief

Executive Officer of the airport management company of West Algeria.

Planned as a large metal and textile tent, the terminal will host delegations in the perspective of the Sixteenth International Conference on Liquefied Natural Gas (LNG16) to be held in April 2010. It will be used as extension and special terminal for Es Senia Airport. Designed in compliance with international standards, the terminal will be divided into two zones covering a total area of 5000m<sup>2</sup>. The first area is dedicated to departures and includes an entrance hall, a VIP lounge and reception, information as well as registration desks. The second area is dedicated to arrivals and includes customs control, police and baggage claim zones.

Even if the primary objective of this project is to host the 3,000 people expected for the LNG16 event, the terminal will also accommodate the exceptional flows of passengers for future congresses and conventions. Mr Rognone, Executive Vice President of Egis Avia, stated that "this structure, to be delivered within 9 months, will ensure comfort, hospitality and safety for visitors and will raise the quality of service of the airport to international levels".

Through this project, Oran acquires dedicated and ideal facilities to organise regional or global events.

## Notes:

### **About Egis**

*Subsidiary of “Caisse des Dépôts” Group with a workforce of 7,300 individuals worldwide and a 504M€ turnover in 2008, Egis is one of the world leading companies in infrastructure engineering and road, railway, air and urban transport systems including hydraulics and environment.
