

# ATALIS Publication Management

Increase the efficiency of the Publication  
of your Aeronautical Information.

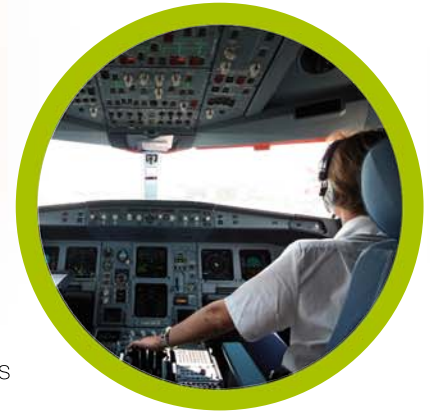

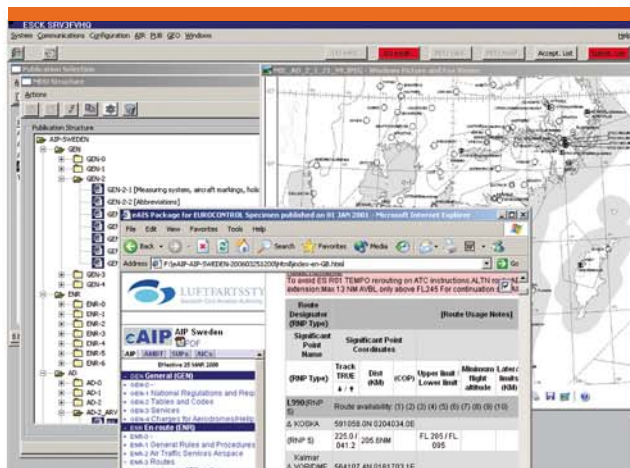

ATALIS Publication Management is the natural extension to ATALIS AIXM database for aeronautical data publication.

ATALIS Publication Management provides all facilities for ICAO publication, dynamically linked to AIXM database.

Such integration prevents discrepancies and inconsistencies in AIP production, as well as an efficient and powerful workflow.

## Highlights

- Based on world leader ©MS Word
- Complete usage of AIXM database for AIP consistency
- Produce all kind of ICAO publication with great level of automation
- Powerful workflow when integrated with ATALIS Charting module
- eAIP synchronized and consistent with AIP processing
- EAD/PAMS interface
